

# Why does my car need a Four Wheel Alignment?

If you are unsure if there is any benefit to having a four wheel alignment check on your car, just read these statistics\*!

**9 out of every 10 cars suffer from some form of misalignment.**

**FACT!**

**Misalignment can:**

**Increase fuel consumption**

**Prematurely wear tyres**

**Affect car handling and therefore safety**

**85% suffer from front toe or steering wheel misalignment, which can be detected through having a four wheel alignment check.**

**FACT!**

**58% of those also suffer some rear toe or thrust line error.**

**FACT!**

**By only having a front alignment/tracking/ Toe & Go check, it may not detect the whole problem.**

**Of those with rear toe or thrust line errors, 71%, were adjustable and corrected in line with motor manufacturers specifications.**

**FACT!**

**By having a full four wheel alignment measurement and adjustment (where applicable) you can potentially SAVE money on fuel and tyres, plus improve safety.**
